Step 1: Go to the "Plugins" section and click.

Step 2: Click "Add New" and Upload the included zip file.

Step 3: Activate it.

----- Intentionally Left in Blank -----

Plugin Overview

If someone keeps visiting your sales page over and over, then it's time to do something. With our plugin you can redirect these visitors to any page of your choice:

- Discount page.
- Fake waiting list for a big scarcity effect (you can then send an autoresponder mentioning that your offer has been re-opened for some hrs)
- Modified version of your sales page.

Or any other kind of page.

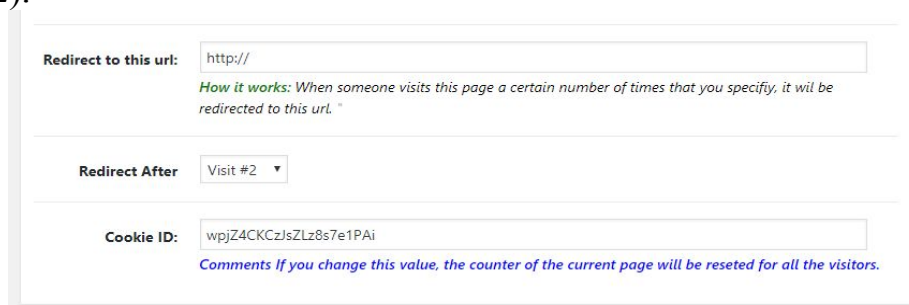

Using The Plugin.

Using the plugin is really easy.

Just go to any wordpress page (or post) and enable the WPPushConvert Option.

Then enter a redirect url (where you want to do the redirect after this page has been visited for a certain number of times.)

Finally, define when do you want to trigger the redirect (example, after visit #2).

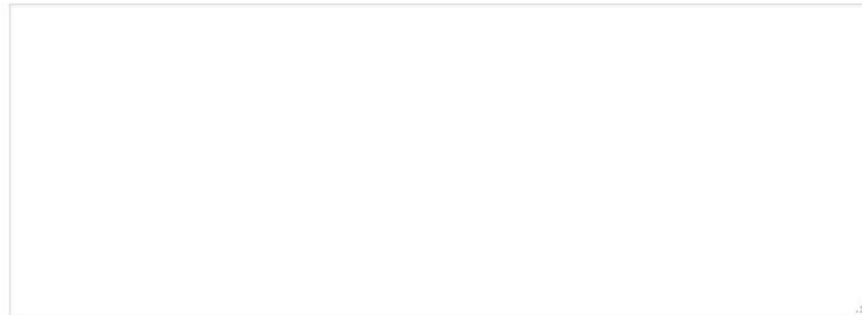

The screenshot shows the configuration interface for the WPPushConvert plugin. It consists of three main sections, each with a label, a text input field, and a descriptive note.

- Redirect to this url:** The input field contains "http://". Below it, a green note reads: "How it works: When someone visits this page a certain number of times that you specify, it will be redirected to this url."
- Redirect After:** A dropdown menu is set to "Visit #2".
- Cookie ID:** The input field contains the alphanumeric string "wpjZ4CKCzJsZLz8s7e1PAi". Below it, a blue note reads: "Comments If you change this value, the counter of the current page will be reseted for all the visitors."

Comment: The cookie id value is auto-generated. If you modify this value, the counter that belongs to that page, will be reseted for all the visitors.

Retargeting Code (Optional): In this area you can enter a Facebook Retargeting code or any other retargeting code of your choice.

**Retargeting Code
(Optional):**

You can use this area to enter a retargeting code (Facebook etc).

Then click “Publish” and that’s all.

That’s all!
