While all attempts have been made to verify information provided, neither I, nor any ancillary party, assumes any responsibility for errors, omissions, or contradictory interpretation of the subject matter herein.

As the FTC Rules requires, we do not guarantee or imply that by using this tool, you will get rich or make money at all.

Software and associated files is distributed as is without any warranty of any kind, either express or implied.
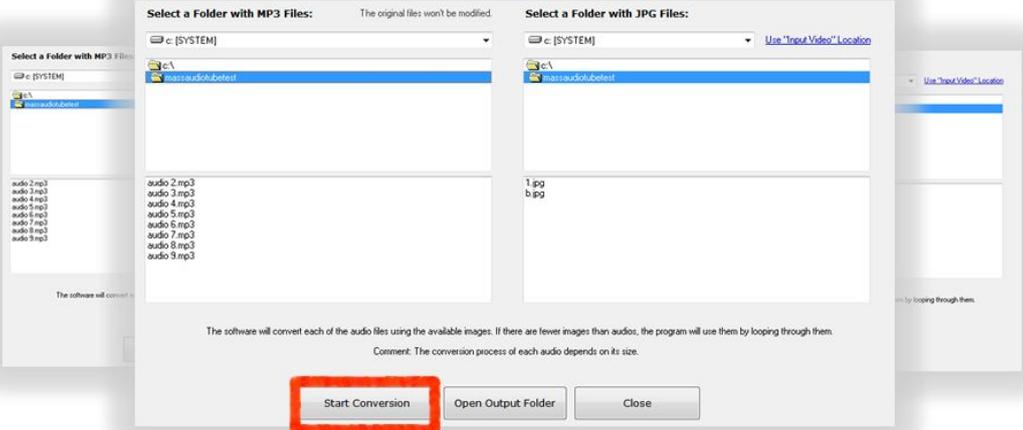

Software and associated files is not freeware or shareware.

Using the Software

Using the software is really easy: just select a folder with 1 or more MP3 files, a folder with JPG files, click "Start Conversion", wait some minutes (depending on the size of your audio files) and that's all.

Once that the process begins, you have to click a console window that will run minimized (here's a screenshot of it)...

... And from there you will be able to see the progress of the conversion.

Once that the process ends, the window will automatically close. After this, you need to click "Open Output Folder" to see the converted videos.

Tip: If you don't see the console window, the process may have ended without your notice. Just click "Open Output Folder" to see if the converted videos are already there.

Comments

1) The process may take some time, depending on the size of each audio file The software will let you know once the process is complete.

Tip: While the process is running, you can this window under your taskbar...

By clicking it you can see the progress of see the progress of the current compression.

2) Each video consists of
   a) An audio
   b) A static image

If you have any problem to see the static image, we recommend you to upload the video to YouTube as a codec may be missing in your pc but everything should be fine when uploading it to this website.

That's All!
