Selling or distribution of the code (in whole or in part) of this program without prior written consent is expressly forbidden.

Introduction

MSB is a software that allows you to create responsive mini sites for any niche with just some clicks. Here's a screenshot of it.

Using it it's really easy (just fill in the blanks), later we'll get into its details but now we'll quickly create our first mini site for testing purposes to see how everything works.

Creating a Demo Website with 1 Click.

To create a demo website, just click the following button:

After this your screen will look like this...

General Site Info

Load Dummy Data

Site Name:

Depression Fighters

Site Headline:

Depression Fighters - Get Rid of Depression

Site Description:

Learn How to Get Rid of Depression without Pills!

Site Footer Text:

Depression Fighters - All Rights Reserved

Ad Spot

Use it to Promote Your Products, Affiliate Products etc

Ad Title:

Best Program to Get Rid of Depression

Ad Description:

Solid program with tons of positive reviews.

Button Text:

Click Here to Access

Link Button to:

http://www.dominatet.it.com

YouTube Video id:

RwFuQR_Wt4M

Leave it empty to not use video.

In the following example, the video ID is the part of a YouTube url that you see in Blue: <https://www.youtube.com/watch?v=0tek2aa8hAQ>

Tip: You can use a Video Promo to Pre-Sell a Product

Template Variation:

1

Build Minisite

Open Output Folder

Close

Basically, the software did the following tasks for our “Demo” website:

- 1) Selected 5 articles (that come preloaded with the software).
- 2) Selected an image (from some that also come preloaded).
- 3) Entered some info about the website.
- 4) Entered the details of an Ad.

Remember, you can use your own information but we’ve added this “Demo” info so you can quickly test how the software works.

Generating the Website

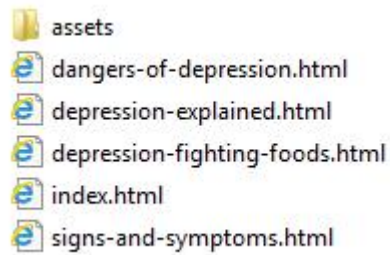

To create the mini site, click the “Build Minisite” button...

Once it finishes, you’ll be able to see the mini site by clicking the following button:

Here’s an example of what you can see:

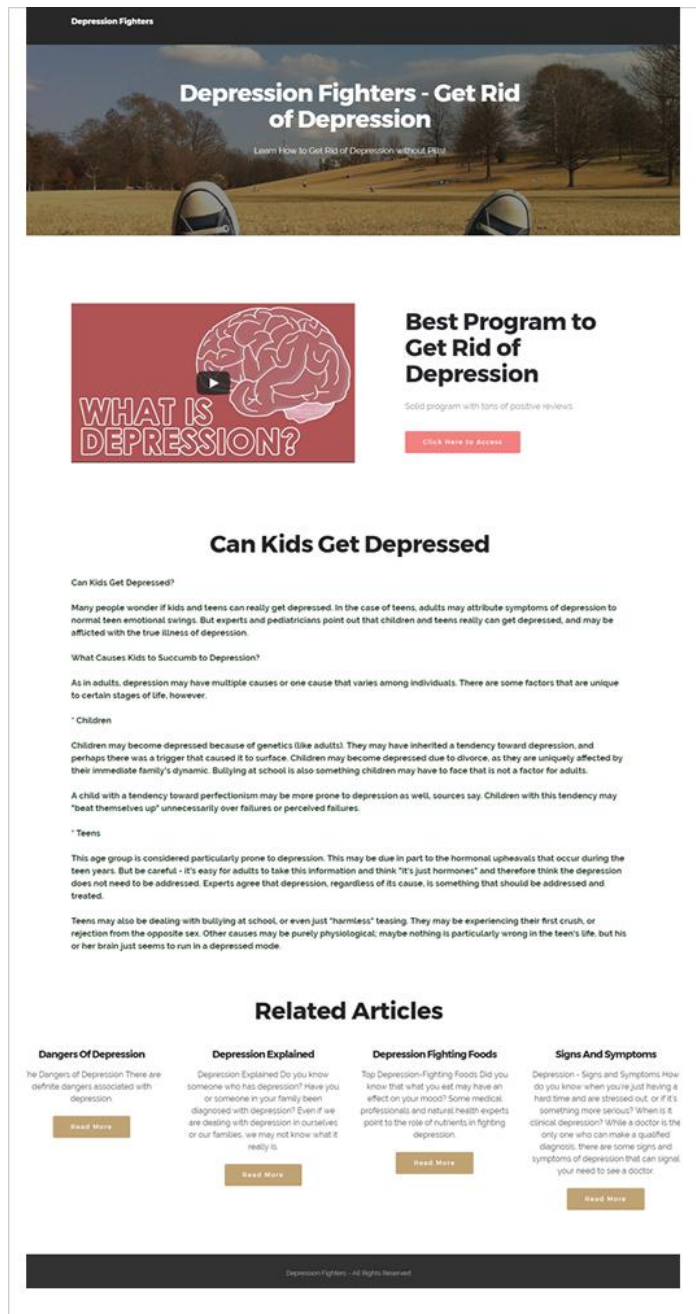

These are all the files that belong to the mini site.

You can see how your mini site looks like by making a double click to the **index.html** file.

Tip: If you have different browsers prefer to see it with one in particular (Google Chrome etc), make a right click over “index.html” ---> open with ---> (Select Your Browser).

Below you can see how a mini site looks like and its sections

(main article, ad spot, related articles):

Header with Parallax Effect

You can use a custom image and text.

Ad Spot

If you want, you can also show a YouTube Video (great to pre-sell a product).

You can link a button to any url of your choice (your offers/affiliate offers etc)

Main Article

Link to Related Articles

Footer

Adding Your Own Content.

Adding Articles:

From this area you can select up to 5 articles (in .txt format) for your mini site (a main article and 4 additional articles). Here are the steps to select these articles:

Step 1: Go to the folder where these articles are.

Step 2: Select an article from the list and then click “Use Current Article...”.

Step 3: Do this until all the articles get selected.

Select a Folder with Articles:

d: [Datos]

- Trabajos
- VB
- BulkArticleRewriterAndSiteBuilder
- app
- apparticles**

Files Found: 5

- can kids get depressed.txt
- dangers of depression.txt
- depression explained.txt
- depression fighting foods.txt**
- signs and symptoms.txt

Remove Article (Main Article) signs and symptoms.txt

Use Current Article as Article #1 Not Selected

Use Current Article as Article #2 Not Selected

Use Current Article as Article #3 Not Selected

Use Current Article as Article #4 Not Selected

If you want to remove an article (to use another one), just click a “Remove Article...” button

Remove Article (#4)

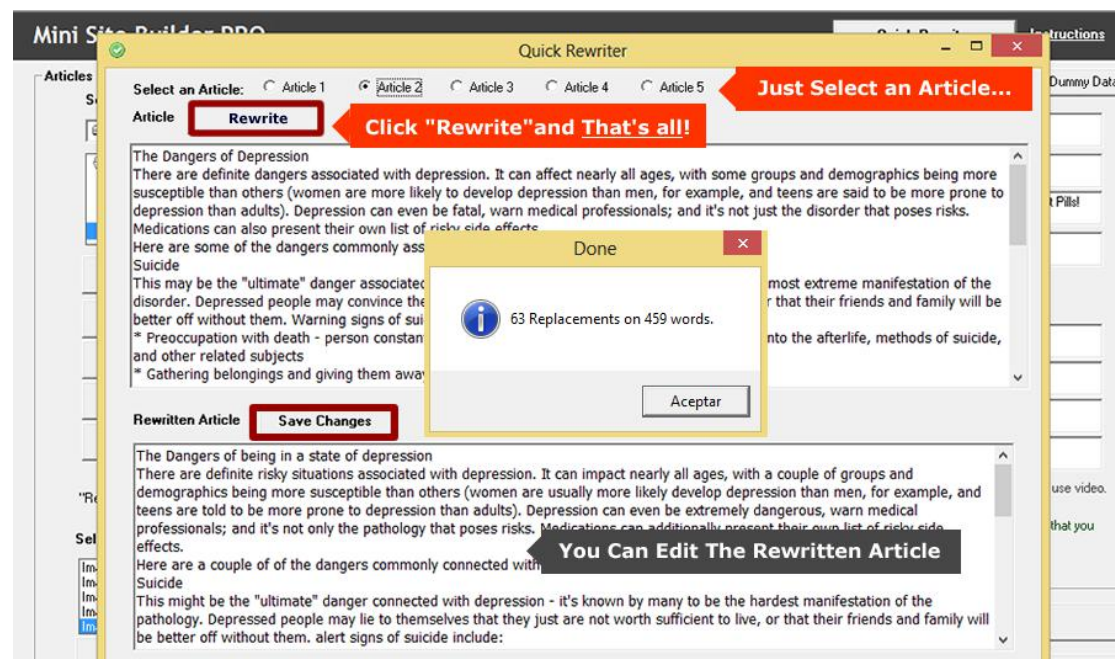

Rewriting Your Articles:

This feature allows you to quickly rewrite one or many of your articles.

To use it click this button....

Then follow these steps...

Tip: If you want, you can edit your rewritten article.

Please remember to click "Save Changes" to update your file.

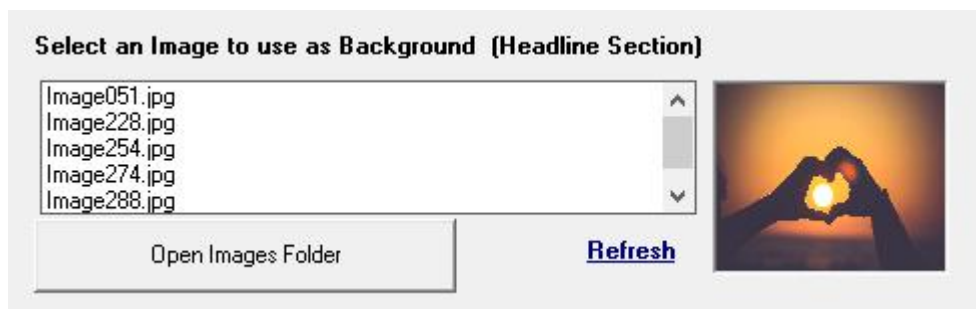

--- Important: Keep backups of your articles before using this feature- ---

Selecting an Image for your mini site:

Each mini site can use an image that will be visible in the header section as you can see below:

Changing this image is very easy: Just select an image from the list and that's all.

If you want to add your own images, please click the button "Open Images Folder" and paste your images there. Then click the "Refresh" option so you see the images that you've added.

General Site Info:

Here's the "General Site Info" section:

Site Name:	Depression Fighters
Site Headline:	Depression Fighters - Get Rid of Depression
Site Description:	Learn How to Get Rid of Depression without Pills!
Site Footer Text:	Depression Fighters - All Rights Reserved

And here you can see how these sections look like inside of the website:

(For spacing reasons, the footer text is not visible here).

Ad Spot:

From here you can setup an ad that it will show on every page of your mini site. You ad can link to an affiliate offer, to another website that you own, to a client website etc.

Ad Spot Use it to Promote Your Products, Affiliate Products etc

Ad Title:	Best Program to Get Rid of Depression	
Ad Description:	Solid program with tons of positive reviews.	
Button Text:	Click Here to Access	
Link Button to:	http://	
YouTube Video id:	fWfuQR_wt4M	Leave it empty to not use video.

In the following example, the video ID is the part of a YouTube url that you see in Blue: <https://www.youtube.com/watch?v=0tek2aa8hAQ>

Tip: You can use a Video Promo to Pre-Sell a Product

Here's how an ad spot looks like:

If you want, you can show a youtube video next to your add (great to pre-sell something) and it's also good to make your mini-sites look more better.

If you use a YouTube video, it will only be visible in the home page of your mini site (the rest of the pages won't show it).

If you don't want to show a YouTube video, just leave the "YouTube Video id:" field empty.

Uploading Your Mini Sites:

You can upload your mini sites to any hosting provider, free or paid.

If you upload it to a free hosting provider, in most of the cases you won't need to register a domain name as the free hosting provider will create a subdomain or subfolder for you.

Something like:

yourusername.freehostingurl.com

Or

Freehostingurl.com/yourusername

Here's a list of some free web hosting providers that may help (please check them as some of them may interrupt their services).

- <http://www.Freehosting.com>
- <https://www.5gbfree.com/hosting-plans/>
- <https://byet.host/free-hosting>
- <http://freehostingnoads.net/webhosting.php>
- <https://freeho.st/client/cart.php>

Please look for a service that provides "FTP" (so you can easily upload your website through an FTP software).

If you have your own domain + a paid hosting, you're surely familiar with these things.

Once you have a hosting account (free or paid), it's time to upload your mini site to the web.

If you don't have an FTP client, i recommend you CoreFTP (but you can use others of course).

You can get it from this url (the Free version is ok):

<http://www.coreftp.com/download.html>

After installing it, click the “Site Manager” button.

From the site manager you can keep the FTP info of all your websites (if you have many).

Once you click it, you'll be able to enter the info of a new website:

A screenshot of the 'Site Manager' dialog box. The dialog has a title bar 'Site Manager'. On the left is a list box containing 'New Site'. Below it is a 'Comments' text area. On the right is a form for entering site information. The 'Site Name' field contains 'New_Site'. The 'Host / IP / URL' field is highlighted with a green box. Below it are 'Username' and 'Password' fields, also highlighted with a green box. To the right of these fields are checkboxes for 'Anonymous' and 'Don't save password'. Below these are 'Port' (21), 'Timeout' (60), and 'Retries' (2) fields, with a 'Retry On' checkbox. Further down are checkboxes for 'PASV' and 'Use Proxy'. A 'Connection' dropdown menu is set to 'FTP'. Below that is an 'SSL Options' section with checkboxes for 'SSL Listings', 'SSL Transfer', 'Clear (CCC)', 'OpenSSL', and 'Windows SSL'. At the bottom are five buttons: 'New Site', 'New Category', 'Connect' (highlighted with a green box), 'Connect Manager', and 'Close'.

Basically, you'll enter 3 values:

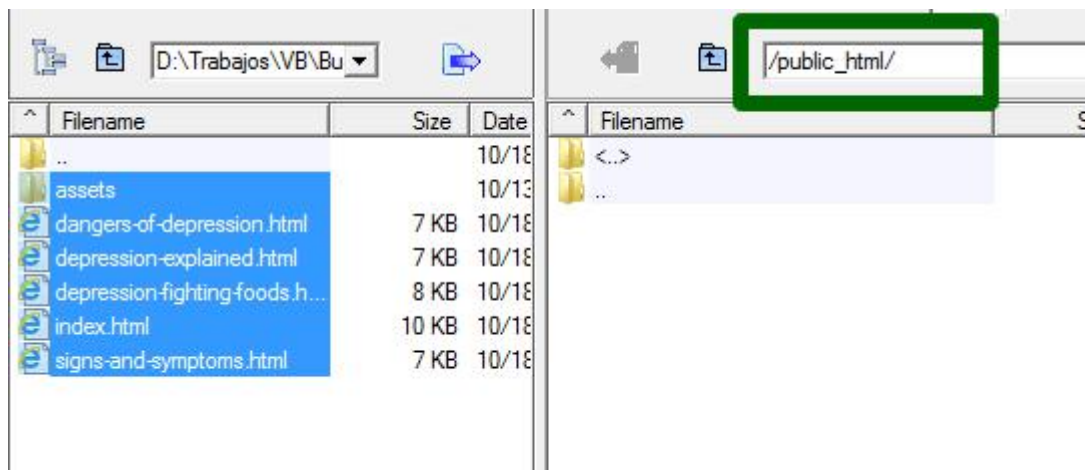

Host
Username
Password

Your web hosting provider will give you this info. If you didn't receive it, please contact them requesting it (tell them that you need the FTP login details: Hostname, User & Pass).

After entering this info, click “Connect”.

After connecting... the right panel will show the folder of your website. You should see a folder named “**public_html**” . Make double click so you get inside of it.

Once you're inside of it it will show this way....

Now, the left panel represents your computer. You need to go to the folder that has the mini site that has been generated by the software (you can paste the location in the location bar or you can use browse it).

Once you're inside of it, select all the files as you can see in the picture (you can click the first item, then press “SHIFT” and click the down button until all the items are selected).

Once all the items have been selected, drag and drop them to the right panel.

That's all!
