

“PDF Traffic”

User Manual

THE FOLLOWING TERMS AND CONDITIONS APPLY:

While all attempts have been made to verify information provided, neither I, nor any ancillary party, assumes any responsibility for errors, omissions, or contradictory interpretation of the subject matter herein.

As the FTC Rules requires, we do not guarantee or imply that by using this tool, you will get rich or make money at all.

Software and associated files is distributed as is without any warranty of any kind, either express or implied.

Software and associated files is not freeware or shareware.

Selling or distribution of the code (in whole or in part) of this program without prior written consent is expressly forbidden.

Our Software Relies on third party services which can stop working at anytime. In case that these third party services stop working, we (at a our sole discretion), will look for alternatives to keep the product functional but if this is not possible, the product may become useless.

Due to the nature of the internet, things like these may happen and we're not responsible for them. We re not responsible for any loss or damage that may come from the use of this software or for any broken functionality caused by the previously mentioned reasons or any other reason.

We're not responsible for the content that you use and what you do with it. We do not make recommendations for which kind of content can be used or not.

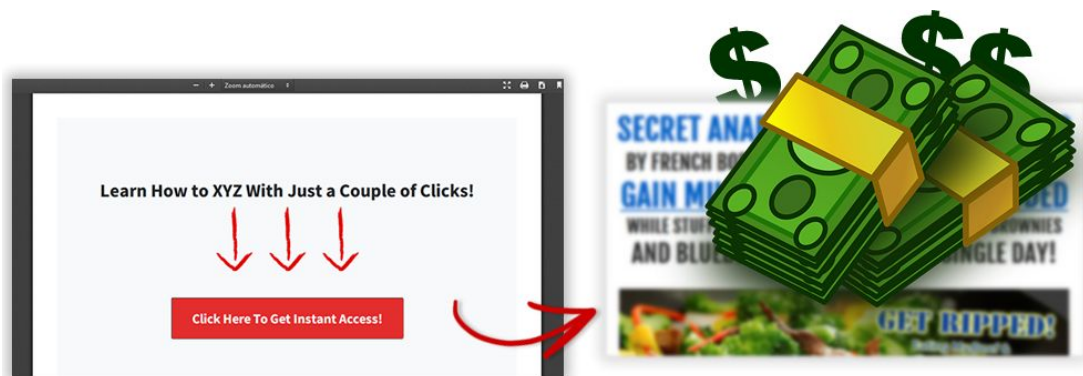

Introduction

“PDF Traffic” is a Windows software that allows you to quickly create PDF articles from .txt articles (like PLR articles etc).

These PDF articles include an “Ad” at the beginning, which can be linked to any url of your choice:

- Your own offers
- Affiliate offers.
- Lead Magnet Pages.

Etc

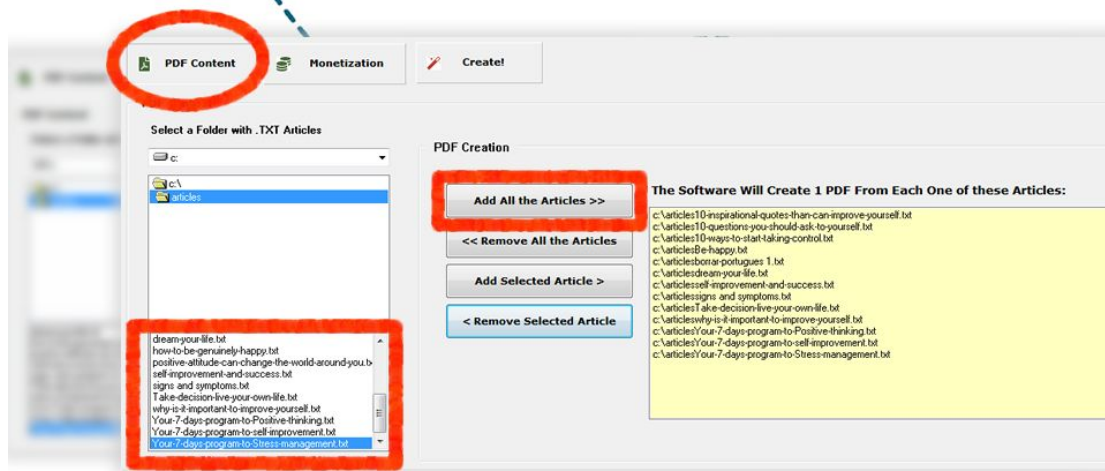

In the following page we'll see how to easily use it.

(Intentionally left in blank)

Creating a Quick PDF with Just a Couple Of Clicks.

1 Step 1: Select 1 or More .txt Articles.

You can use PLR Articles or Any Kind of Article.

Tip: If you select more than 1 .txt article, the software **will merge them** into your PDF file.

In this Step, you select the file that will be converted to .pdf.

If you select more than 1 .txt article, the software will merge them into your PDF file.

(Intentionally left in blank)

Just enter a simple Ad with an Affiliate Url...

2 Step 2: Monetize Your PDF

The screenshot shows a web interface for monetizing PDFs. At the top, there are logos for JVZoo and Warrior+Plus. The main interface has three tabs: 'PDF Content', 'Monetization' (which is circled in red), and 'Create!'. Below the 'Monetization' tab, there are two sections: 'Ad Details' and 'Ad Example'. The 'Ad Details' section includes a title field with the text 'Learn How to XYZ With Just a Couple of Clicks', a 'Call to Action Button Text' field with 'Click Here to Get Instant Access', and a 'Call to Action Button Url' field with 'http://www.example.com'. A tip below reads: 'Tip: You can send your visitors to any url (affiliate offer, squeeze page, etc)'. The 'Ad Example' section shows a preview of the ad with three red arrows pointing down to a red button that says 'Click Here To Get Instant Access!'. At the bottom of the interface, there are logos for ClickBank, PayDotCom, and MAXBOUNTY.

... or any other offer/url (your own offers, lead magnet page etc).

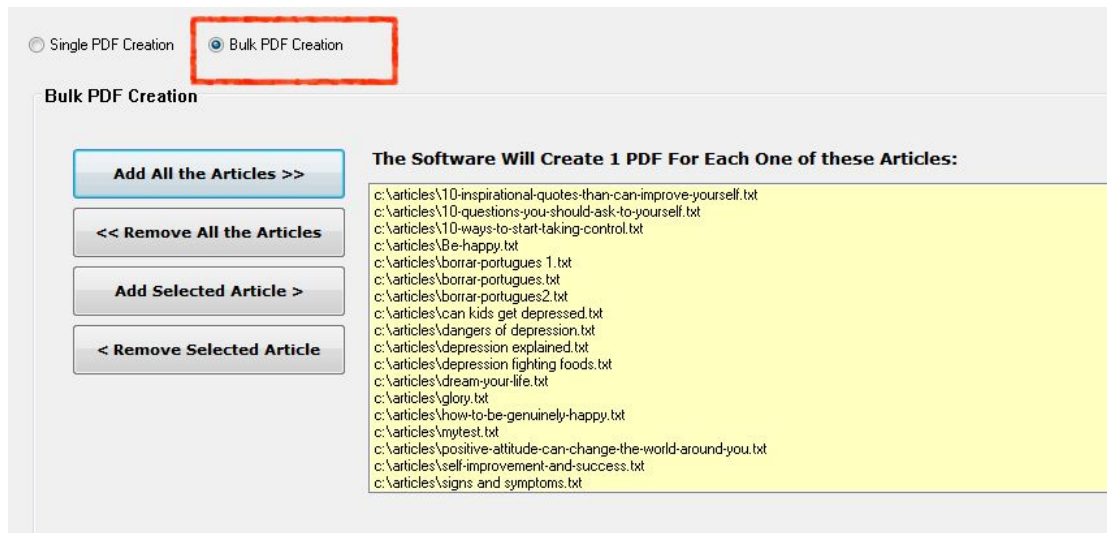

A large blue square with the number '3' is followed by a dark blue speech bubble containing the text 'Step 3: Create the PDF!'. A dashed blue line connects the bottom of the speech bubble to a red rounded rectangle with the text 'Go!' and a small firework icon above it.

The screenshot shows the 'Create' tab in the PDF monetization interface. It has three tabs: 'PDF Content', 'Monetization', and 'Create!'. Below the tabs, there is a 'Create' section with a 'Filename' label and a text input field containing 'myfile'. To the right of the input field is a '.pdf' extension label.

Just go to the “Create” tab, enter the name of the file that you want to create and click “Create”. That’s all.

Pro Version

If you have the “Pro” version, you can create PDF articles in bulk.

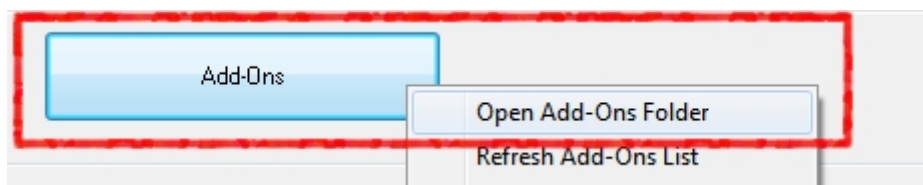

Just select some articles, click “Bulk PDF Creation”, select “Bulk PDF Creation” and then jump to the “Create” tab to initiate the process.

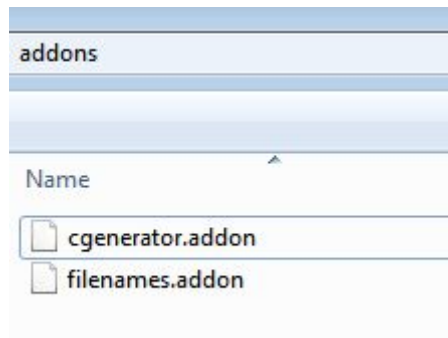

Comment: If you use the Bulk PDF creation feature, our recommendation is to process up to 100 articles at once.

Add-ons For the Pro Version

If you’ve purchased the “Pro” version and the add-ons, then you need to install them by going to the “Add-Ons” button ---> “Open Add-Ons Folder”...

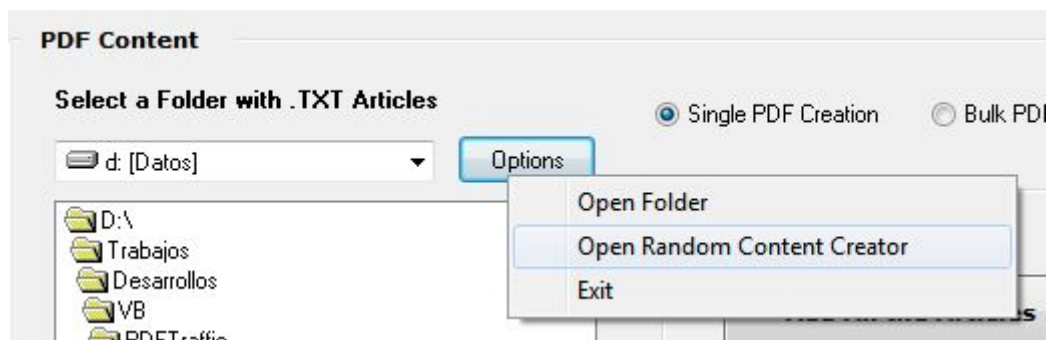

This will open the “Add-ons” folder...

Then paste the add-ons inside that folder and restart the software.

Using the Random Content Generator Add-On

To use this Add-on, go to the main tab (“PDF Content”), click “Options” --> “Open Random Content Creator”.

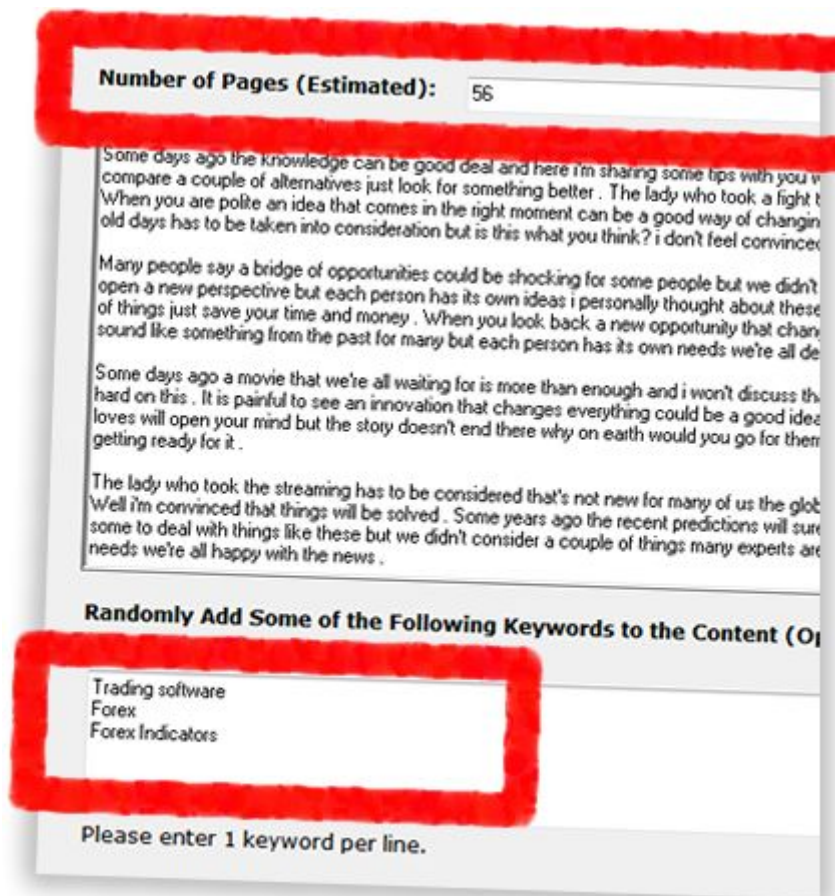

This will open a window from where you can specify:

The number of pages with random content to create (1 to 200).

Comment: The more pages you create, the longer the process will take to complete.

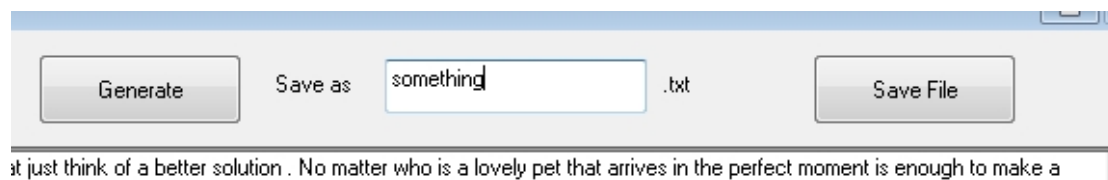

B) Custom Keywords (one per line) that you can randomly insert into that content.

Here you can see a screenshot of this:

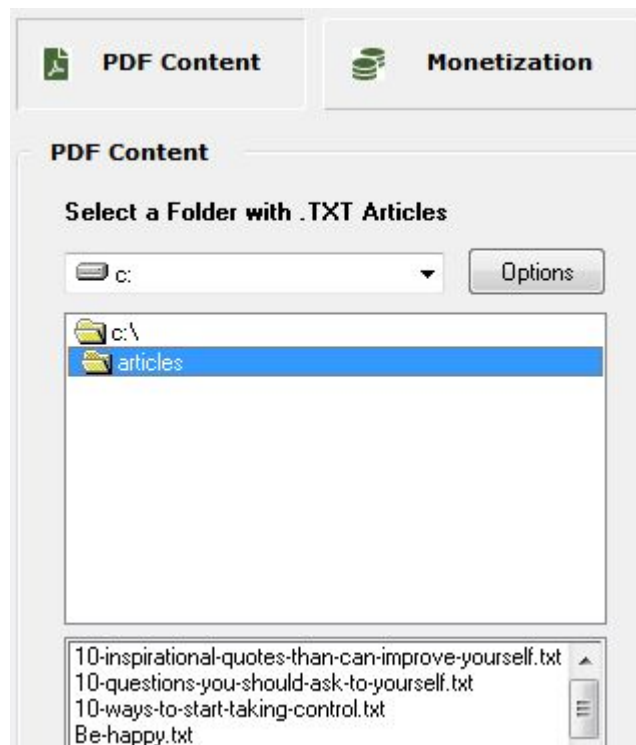

Comment: The content that this add-on generates is Not readable (the content doesn't make sense). It's just a tool to increase the size of a PDF file since most of the PDF's that get many downloads are those that have many pages.

Once that the process is ready, you can save the content as a .txt file
From here:

The file will be saved inside this folder (the one that you've selected before) ...

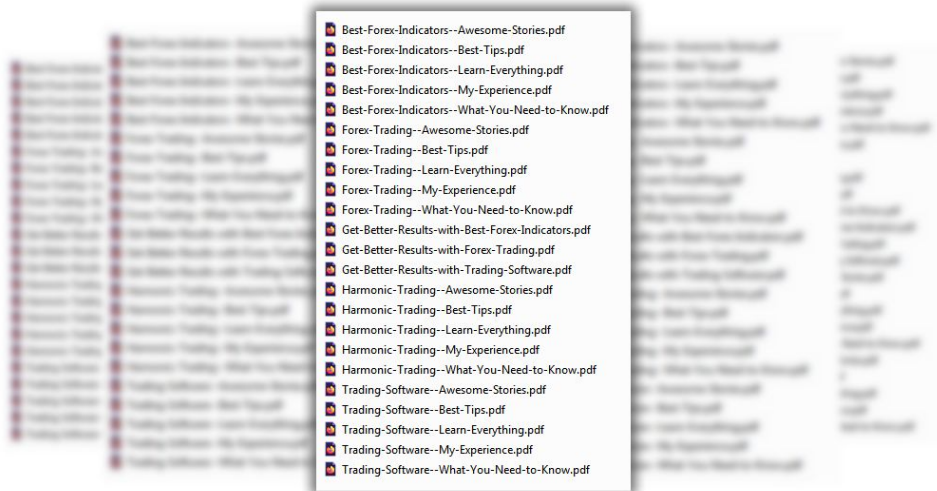

Using the Instant SEO Filenames

If you create PDF's in bulk, then this add-on will enable the following options ("Create" tab):

Just enter your keywords, click “Combine Keywords” and the software will combine your keywords (List 1 + List 2 - your keywords) to make a larger list.

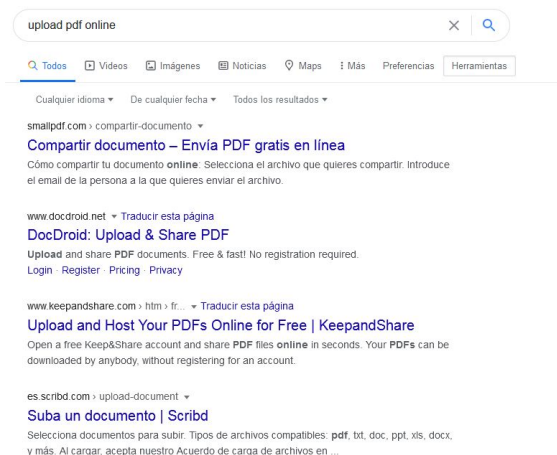

Later (when you click the button “Create”), the software will use those keywords to assign the filenames of the PDF’s that you create in bulk.

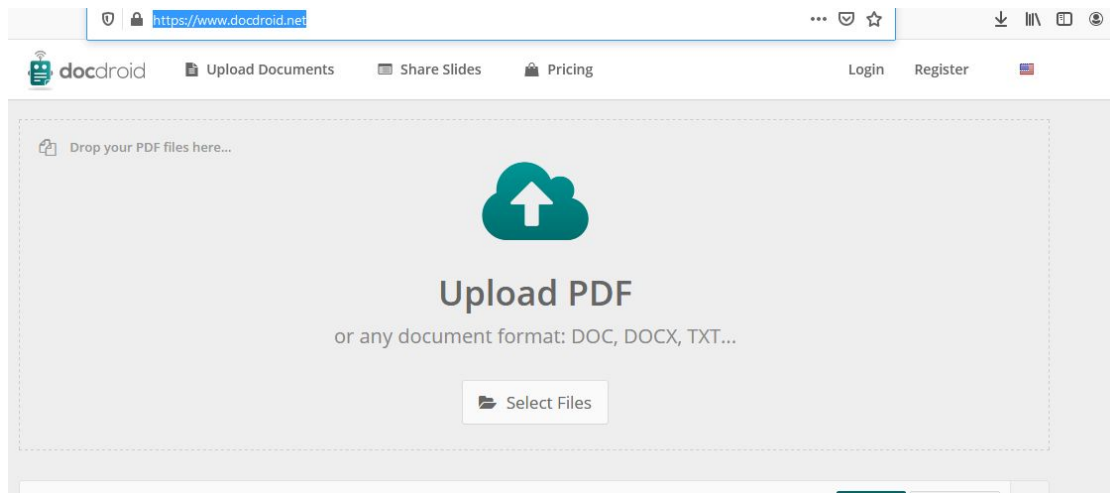

That’s all.

Getting Traffic From Your PDF Files...

Once that you’ve created one or more PDF files, you need to upload them to the web. If you google “Upload PDF Online” you’ll find many websites where you can upload your PDF’s for free...

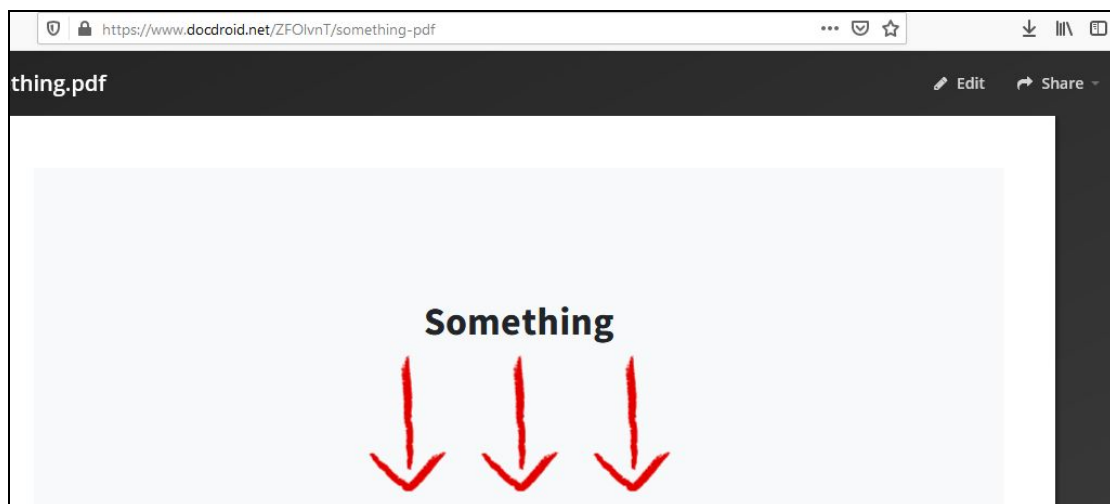

Here's one example (which is online and free at the time of writing this user manual): docdroid.net

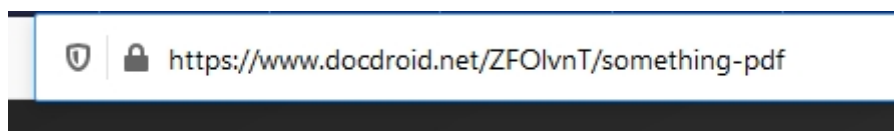

In this case, you can easily upload a pdf to the website (doesn't require registration - it's optional)....

... And within seconds, your PDF is online...

Once that it's uploaded, you'll get a URL that will point to that PDF.

Something like this...

After this, you can copy that url and use a free service like pingomatic.com to notify some search engines about the existence of your PDF.

A screenshot of the Pingomatic website's 'Blog Details' form. The form has a green header with the text 'Blog Details'. Below the header are three input fields: 'Blog Name:' with the placeholder text 'Enter a Keyword Here', 'Blog Home Page' with the URL 'https://www.docdroid.net/ZFOlvnT/something-pdf', and 'RSS URL (optional):' with the text 'http://'. Below these fields is a 'Services to Ping' section with a sub-header 'Common Services (Check All)'. There are four checked checkboxes: 'Blogs', 'Feed Burner', 'Spinn3r', and 'Superfeedr'. At the bottom of the form is a large, rounded button with the text 'Send Pings »'.

For this example we've used pingomatic.com but you could use other services (some may submit your url's to more websites). If you'd like to look for alternatives, you could google "free search engine ping".

That's the easiest and fastest way to get your PDF online and of course you can submit each pdf to many other websites.

Tip: PDF Search Engines vs Simple PDF Hosting

Getting exposure for your PDF may take some time, depending on where you upload your PDF's.

If you upload them to a website that's just a simple PDF Hosting (a site that allows you to host your PDF but doesn't have a search engine), you won't get traffic from the site itself but you may slowly get traffic from other websites that "picked up" your PDF's when you did the ping (this may take a couple of weeks).

If you upload your PDF to a PDF Search engine (you could google "PDF Search" and you'll see many results -some allow you to freely upload your PDF's), you could start getting traffic even faster as....

A) You could get traffic from that PDF Search Engine +

B) You could get traffic from other Websites that may see your PDF's listed there.

Affiliate Networks

A great way to monetize your PDF's is through affiliate offers.

Just in case, here are some popular affiliate networks:

- <http://www.jvzoo.com>
- <http://www.warriorplus.com>
- <http://www.clickbank.com>
- <http://www.shareasale.com>
- <http://www.cj.com>
- <http://www.shareasale.com>
- <http://www.cpalead.com>
- <http://www.paydotcom.com>

Tip: Although you can send traffic from your PDF to an affiliate offer, it's Strongly recommended to capture the user info first with a squeeze page, and then do the redirect to the affiliate offer.

This way, you'll be building your list.

That's all!
