Software and associated files is not freeware or shareware.

Selling or distribution of the code (in whole or in part) of this program without prior written consent is expressly forbidden.

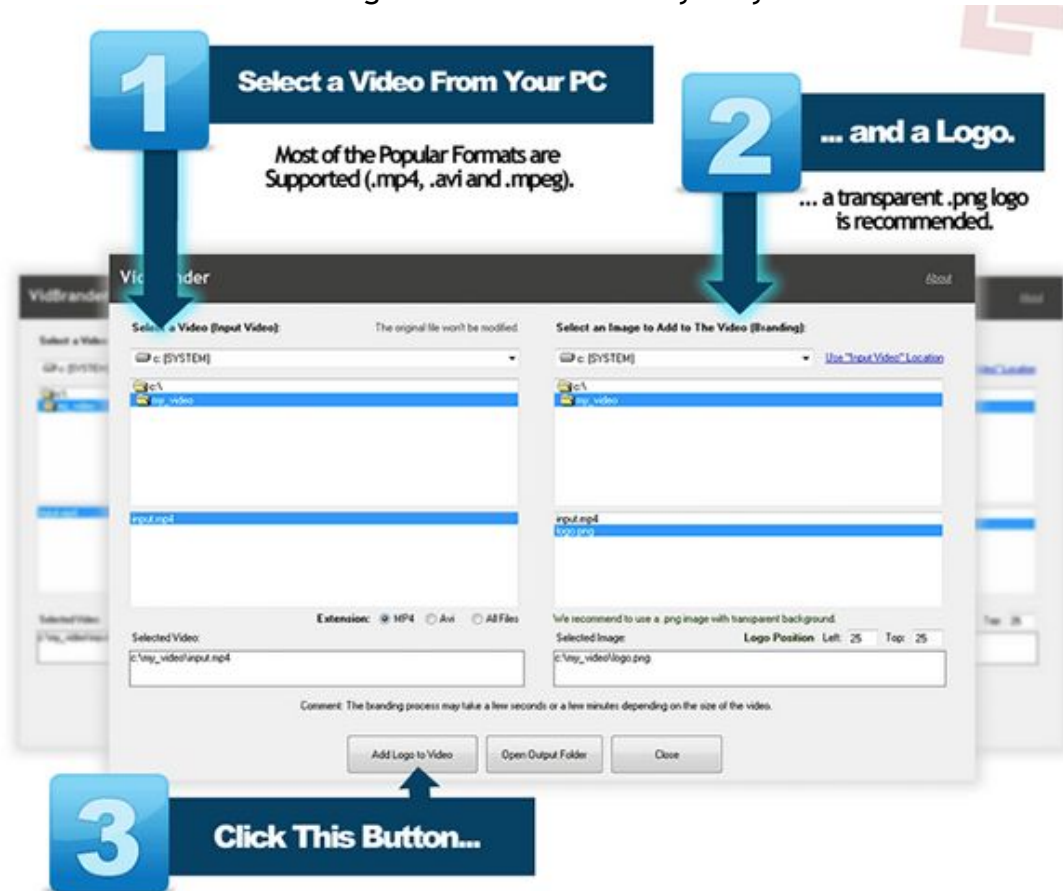

We're not responsible for the content that you use and what you do with it.

Introduction

“VidBrander” is a Windows software that allows you to add your logo to your videos with just a few clicks of your mouse.

How to Use The Software

Using the software is really easy.

The process may take a few seconds (or minutes), depending on the size of your video.

You can monitor the progress by clicking a console window that will open when you begin the process. Here's a screenshot of this console from where you can see the extraction progress ...

Once that the process ends, the window will be automatically closed.

To see the new video, just click the “Open Output Folder” and You’ll see the new video with your logo.

Some Considerations

- You Should Use .PNG images for your logo, if possible with transparent background (this will make your videos look better).
- The software will add your logo “as is”, so if your logo is too big, you should resize it first (you can use an online free tools like <https://onlinepngtools.com/resize-png> or you can google “free png resizer online” for more alternatives).
- You can adjust the position of the logo from here:

Logo Position Left: Top:

These values come by default (to show the logo in the upper left corner of Your video), but you can test other values.

These values come by default (to show the logo in the upper left corner of Your video), but you can test other values.

- Don’t have a Logo? At the time of writing this user manual, you can create a free one right here: myfreelogomaker.com.

That’s all!
