

“Don-Key Linker”

User Manual

THE FOLLOWING TERMS AND CONDITIONS APPLY:

While all attempts have been made to verify information provided, neither I, nor any ancillary party, assumes any responsibility for errors, omissions, or contradictory interpretation of the subject matter herein.

As the FTC Rules requires, we do not guarantee or imply that by using this tool, you will get rich or make money at all.

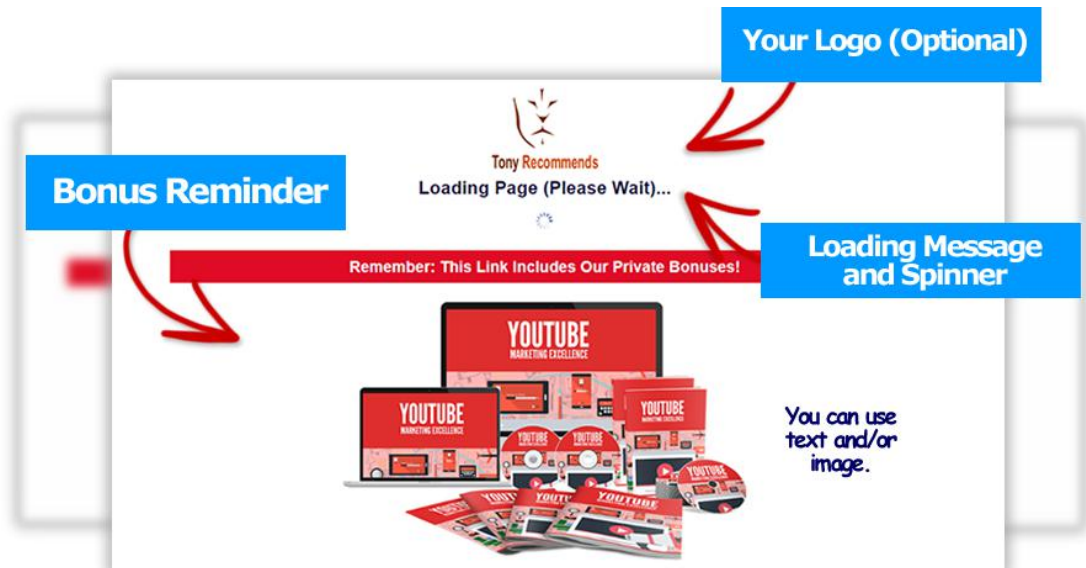

Software and associated files is distributed as is without any warranty of any kind, either express or implied.

Software and associated files is not freeware or shareware.

Selling or distribution of the code (in whole or in part) of this program without prior written consent is expressly forbidden.

Introduction

"Don-Key" Linker is a WordPress plugin that allows you to create a soft redirect page for an affiliate product ... with a reminder of the bonuses that you offer to those who buy through your link.

See? Instead of directly linking your visitors to the affiliate offer, you send them to a "Soft Redirect Page"...

...that shows a quick reminder of the Private Bonuses that You're Offering to Those Who Buy Through YOUR LINK.

In addition to this, the software also allows you to create bonus delivery pages on the fly for you.

Installing The Plugin.

Installing the plugin is like installing any other WP plugin.

Step 1: Go to the "Plugins" section and click.

Step 2: Click "Add New" and Upload the included zip file.

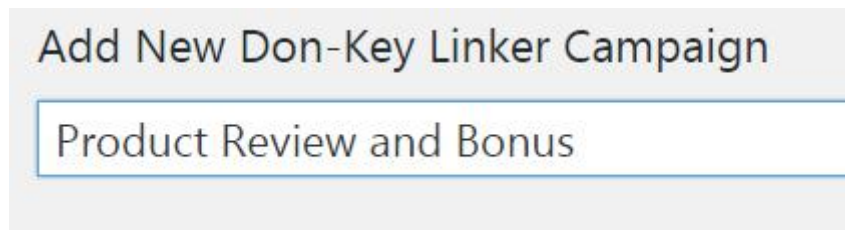

Step 3: Activate "Don-Key".

Using “Don-Key Linker”.

After activating the plugin, you can start creating campaigns by going to the “Don-Key Linker” menu (Admin Sidebar) ---> Add New.

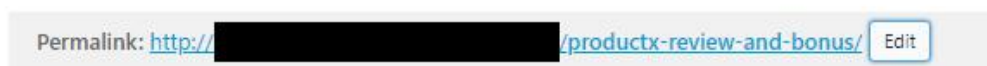

Then assign a name to the new affiliate funnel. Example.

What you use here will be used for the “**permalink**” of your affiliate funnel.

Here you can see an example of this...

If you click that link (we recommend you to open it using CTRL + click to open it on a new window so you don’t have to leave the WP Editor), you will have a preview of your affiliate page (which may be empty until you add some info to it).

Soft Redirect Page Settings:

Soft Redirect Page

Logo Image (Optional):
If you want to use your own logo for branding purposes, you can do it right here.

"Loading" Text:
Example: Loading Page (Please Wait)...

"Loading" Text Color:

Bonus Headline:
Example: Remember, This Link Includes Our Private Bonuses!

From here you can setup the soft redirect page for your campaign. Doing this is really easy: just fill in the blanks (each field has a description that will help you) and then click the "Publish" button (upper right area of your page).

Using the Color Picker Control:

Some fields include a color picker. If you're new to this color picker control, you can select a color by following these steps:

- Step 1: Click "Select Color".
- Step 2: Select the color.
- Step 3: Click "Select Color" again.

Tip: Each color has a code number. If you want to use the same color on different areas, you can copy/paste the code.

Bonus Delivery Page:

If you want to create a bonus delivery page (from where your bonus / bonuses will be delivered), please fill in the blanks of that section.

There's a field in particular called "Access Key".

Access Key: *To get access to this page, you need to pass the following parameter to your main page: `?dldkey=yoursecretkey` . Example: `http://127.0.0.1:4001/wordpress/wpadmin/my campaign/?dldkey=yoursecretkey`. Your secret key must not contain spaces or strange characters. Remember to replace `"/my campaign/"` with the name of your campaign (you can see this value by making a preview of your campaign - the name of the campaign will be visible in the url.) Please read the user manual for more details.*

In this field you need to enter a security code to protect your delivery page.

In 1 minute we'll see how this key is used.

Then, save your page.

To get access to this page, you need to pass the following parameter,
To your campaign url...

?dldkey=yourkey

For example, suppose that you have the following permalink for your affiliate campaign:

<http://yoursite.com/wpaln/productx/>

If you don't add a parameter at the end of your permalink, you'll get access to the soft redirect page.

If you want to see the “**Download Page**” you need to add the following parameter at the end of the permalink:

?dldkey=yourkey

Example:

<http://yoursite.com/wpaln/productx/?dldkey=yourkey>

Comment: You need to replace “yourkey” with the access key that you've added under the “Access Key” field (“Bonus Pre-Access Page”).

So, if we use the access key is “123”, then our example (including the parameter with the access key), will look like this:

<http://yoursite.com/wpaln/productx/?dldkey=123>

This will give you access to the “Bonus Delivery Page”.

If you want to prepare a bonus for a JVZoo product, go to the product page from where you get the affiliate link, add add your page under “Add Bonus”.

Upload Bonus File:

No file chosen

Accepted file types: pdf, zip, rar, gz. Up to 128MB.

If you want to add your bonus delivery page to an Affiliate Product from the WarriorPlus Platform, just click the “Get Link” button that belongs to the product that you want to promote (you must have been approved to do this)...

... and add your “Bonus Delivery” url.

Your Affiliate Link

<https://warriorplus.com/o2/a/r34tc/0>

Buyer Bonus URL (optional)

Your Bonus Delivery Url Goes Here

Something similar happens with other affiliate platforms that have an automatic bonus delivery mechanism.

Comment: If you're using bonuses i recommend you to only work with those affiliate platforms that have an automatic bonus delivery mechanism, otherwise, manually delivering your bonuses may be a nightmare.

That's all!
