Selling or distribution of the code (in whole or in part) of this program without prior written consent is expressly forbidden.

Installing The Plugin.

Installing the plugin is like installing any other WP plugin.

Step 1: Go to the "Plugins" section and click.

Step 2: Click "Add New" and Upload the included zip file.

Step 3: Activate it.

----- Intentionally Left in Blank -----

Plugin Overview

If someone keeps visiting your sales page over and over, then it's time to do something. With our plugin you can redirect these visitors to any page of your choice:

- Discount page.
- Fake waiting list for a big scarcity effect (you can then send an autoresponder mentioning that your offer has been re-opened for some hrs)
- Modified version of your sales page.

Or any other kind of page.

Using The Plugin.

Using the plugin is really easy.

Just go to any wordpress page (or post) and enable the WPPushConvert Option.

Then enter a redirect url (where you want to do the redirect after this page has been visited for a certain number of times.)

Finally, define when do you want to trigger the redirect (example, after visit #2).

The screenshot shows the WPPushConvert plugin settings interface. It includes the following fields and options:

- Enable:** A dropdown menu set to "Yes". Below it is the text: "Enable WPPushConvert for this page."
- Redirect to this url:** A text input field containing "http://". Below it is the text: "How it works: When someone visits this page a certain number of times that you specify, it will be redirected to this url."
- Redirect After:** A dropdown menu set to "Visit #2".
- Cookie ID:** A text input field containing "wpjZ4CKCzJsZLz8s7e1PAi". Below it is the text: "Comments If you change this value, the counter of the current page will be reseted for all the visitors."

Pro Version

In the pro version you can set to additional redirects that you can use in many ways (to offer progressive discounts etc). Here you can see the additional redirects:

Redirect to this url:
When someone visits this page a certain number of times that you specify, it will be redirected to this url. "

Redirect After

Redirect to this url:
When someone visits this page a certain number of times that you specify, it will be redirected to this url. "

Redirect After

Redirect to this url:
When someone visits this page a certain number of times that you specify, it will be redirected to this url. "

Redirect After

If you don't want to use the second or the third redirect, just leave the default redirect value (http://) or leave them empty.

Comment: The cookie id value is auto-generated. If you modify this value, the counter that belongs to that page, will be reseted for all the visitors.

Then click "Publish" and that's all.

That's all!
