Introduction

Today (thanks to the explosion of the social networks), we can see how **millions of links** are being naturally shared: **News, Sports, Stories etc.**

The problem is that most of the people share these sites...**For Free** (they get **no money at all** for their actions).

WPLinkCloaker allows you to change this by letting you **show your offers** over the sites that you recommend.

And this could be great to get more sales and subscribers.

Hope that you enjoy it!

That's All!

Once you've entered your details for a campaign, click the "Publish" button (which can be usually found on the right).

Comments:

1. The First Field is the "Permalink" (will create a short name for your target url under your domain).
2. Once that the link has been created, you can click the permalink to preview it...

3. Under the "Popup Content" section, you can enter whatever you want to show in the popup (any combination of images and text etc).

Advanced: If you want to enter a code (autoresponder etc), you need to go to the "Text" tab of the editor and paste it there (important: if your have issues with your code, please contact the developer who gave you that code).

4. Some external sites may not work with our plugin and this is because they apply a policy called "Same Origin" policy (which we respect and we recommend you to do it).

Although you may find some sites that use this policy, there are millions that don't use it.
